CLASSIFICATION SYSTEM										
Policy: All facilities will develop and implement a system according to which ICE detainees are classified. The										
classification system will onsure that each detained is place	ed in th	eappe	<u>dianera</u>	tegory, physically separated						
from detainees in other categories										
Components		N	NA -	Femaliks						
The facility has a system for classifying detainees. In CDFs and IGSAs, an Objective Classification System or similar is used.										
 The facility classification system includes: Classifying detainees upon arrival. Separating individuals who cannot be classified upon arrival from the general population. The first-line supervisor or designated classification specialist reviewing every classification decision. 										
The intake/processing officer reviews work-folders, A- files, etc., to identify and classify each new arrival.										
Staff use only information that is factual, and reliable to determine classification assignments. Opinions and unsubstantiated/ unconfirmed reports may be filed but are not used to score detainees classifications.										
Housing assignments are based on classification- level.										
A detainee's classification-level does not affect his/her recreation opportunities. Detainees recreate with persons of similar classification designations.	⊠									
Detainee work assignments are based upon classification designations.	\boxtimes									
The classification process includes reassessment/reclassification. For IGSA's detainees may request reassessment between 45 and 60 days after arrival. For CDF's detainees are re-assessed approximately every 60 days.				Reclassification requests are forwarded to Rose Leblanc, Supervisor						
The classification system includes standard procedures for processing new arrivals' appeals. Only a designated supervisor or classification specialist has the authority to reduce a classification-level on appeal.				Appeals can be submitted to Ms. Leblanc or to Warden through the grievance process						
Classification appeals are resolved within five business days and detainees are notified of the outcome within 10 business days.										
Classification designations may be appealed to a higher authority such as the Warden or equivalent.			, i							
The Detainee Handbook or equivalent for IGSAs explains the classification levels, with the conditions and restrictions applicable to each.

SPECIAL MANAGEMENT UNIT (Disciplinary Segregation)

Eplicy: Each lacility will establish a Special Management Unit in which to isolate certain detainees from the general population. The Special Management Unit will have two sections, one for detainees in Administrative Segregation, the other for detainees being segregated for disciplinary reasons.

Components		NA	Senalis -
Officers placing detainees in disciplinary segregation follow written procedures.			
The sanctions for violations committed during one incident do not exceed 60 days.			Maximum is ten days for one offense
 A completed Disciplinary Segregation Order accompanies the detainee into the SMU. The detainee receives a copy of the order within 24 hours of placement in disciplinary segregation. 			
 Standard procedures include reviewing the cases of individual detainees housed in disciplinary detention at set intervals. After each formal review, the detainee receives a written copy of the decision and reasons for it. 			Assistant Warden conducts formal review
The conditions of confinement in the SMU are proportional to the amount of control necessary to protect detainees and staff.	⊠		
Detainees in disciplinary segregation have fewer privileges than those housed in administrative segregation.			
 Living conditions in disciplinary SMUs modified to reinforce acceptable behavior. If yes, does staff prepare written documentation for this action. Does the OIC sign to indicate approval. 			
Every detainee in disciplinary segregation receive the same humane treatment, regardless of offense.			
 The quarters used for segregation are: Well-ventilated. Adequately lighted. Appropriately heated. Maintained in a sanitary condition. 			
 All cells are equipped with beds. The beds securely fastened to the floor or wall of the cell. 	⊠		
 The number of detainees confined to each cell or room do not exceed the number for which the space was designate. Does the OIC approve excess occupancy on a temporary basis. 			
When a detainee is segregated without clothing, mattress, blanket, or pillow, (in a dry cell setting) a justification is made and the decision is reviewed each shift. Items are returned as soon as it is safe.	X

Written policy authorizes staff to respond in an immediate-use-of-force situation without a supervisor's presence or direction.	⊠			
When the detainee is in an area that is or can be isolated (e.g., a locked cell, a range), posing no direct threat to the detainee or others, officers must try to resolve the situation without resorting to force.				
Written policy asserts that calculated rather than immediate use of force is feasible in most cases.				
 The facility subscribes to the prescribed Confrontation Avoidance Procedures. Ranking detention official, health professional, and others confer before every calculated use of force. 				
 When a detainee must be forcibly moved and/or restrained and there is time for a calculated use of force, staff use the Use-of-Force Team Technique. Under staff supervision.

MEMORANDUM FOR:

John P. Torres Director (Acting) Office of Detention and Removal

THROUGH:

Official Channels

FROM:

Reviewer-in-Charge

SUBJECT:

Calcasieu Parish Correctional Center Follow-Up Detention Review

On October 31 – November 1, 2005, a follow-up review was conducted for the Calcasieu Parish Correctional Center located within the New Orleans Field Office. This review was performed under the supervision of (b)(6), (b)(7)c (b)(7)

The scheduled annual review was conducted on June 20 - 22, 2005 and a recommendation was made for a rating of "Good". However, on September 24, 2005, Hurricane Rita made landfall in Louisiana as a Category 3 hurricane. The Lake Charles, Louisiana area suffered severe damage and power outages. The detainee population was evacuated from the facility but the staff was required to report in and remain at the facility to respond to emergencies. When the power was restored, the staff worked diligently to clean and prepare the facility for repopulation. On October 12, 2005, the Office of Public Health performed an inspection and determined the facility was cleared for repopulation. In addition, the State Fire Marshal approved the facility for occupancy and allowed them to house an additional 200 detainees if necessary until January 13, 2006.

Type of Review:

This review is a follow-up Operational Review to determine general compliance with established Immigration and Customs Enforcement (ICE) National Detention Standards.

Review Findings:

No DHS Standards have been identified as overall deficient.

Detention Review Summary Report Page 2

RIC Observations:

During the review in June 2005, the review team discovered that the facility did not have a policy to test all incoming detainees for Tuberculosis (TB). The review team also discovered that the correctional staff used to distribute medications was not properly trained. Warden Tete explained that the new Sheriff's administration was in the process of creating a funding string to perform TB testing on all new arrivals. He assured the review team that any new ICE detainees that entered the facility who could not provide recent proof of TB clearance would be tested and funding would be made available from another source. The new medical staff has now trained the correctional officers to distribute medication after hours.

Please refer to the standard of Hold Rooms In Detention Facilities, under the component that reads, "Individuals are not held in hold rooms for more than twelve hours". I marked this component "No". The facility may keep a detainee in a hold room area longer than 12 hours awaiting medical clearance or classification for dormitory assignment. If this becomes necessary, the detainee is transferred to a private cell that is located within the holding area. This cell contains a bed and toilet facilities and the detainee is made comfortable until the assignment process is complete.

Although the local ICE office currently handles land transportation, the review team inspected this standard in the event the contract is renegotiated to include transportation costs.

The facility did not receive a thirty-day notice of this review, but no constraints or difficulties were encountered. They were prepared for this review and readily produced the necessary documentation to satisfy the components within each standard. They provided access to all departments and buildings within the facility. The administrative staff and correctional officers are still dealing with personal issues that were created as a result of the storm. Many are still residing in temporary housing, awaiting the repair of their permanent dwellings. These setbacks have not prevented them from performing their duties and providing a safe and secure environment for the detention population.

Best Practice:

The facility has prepared an exceptional detainee handbook. In addition to the handbook, the detainee population is provided with Inmate Television. Channel 16 is displayed in the dormitory and living areas for a minimum of one hour each day. It provides a continuous review of the rules and regulations, available rehabilitative and educational programs, religious services, disciplinary policy, etc. New information pertinent to the detainee's daily living and any updates to policy and procedures are displayed within minutes.

Recommended Rating and Justification:

It is the Reviewer-in-Charge recommendation that the facility receive a rating of "Good".

RIC Assurance Statement:

All findings of this review have been documented on Form G-324B and are supported by the written documentation contained in the review file.

Significant Incident Summary Worksheet

For ICE to complete its review of your facility, the following information <u>must be completed</u> prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

SUBJECT:

The annual review of the Calcasieu Parish Correctional Center conducted on October 31- November 1, 2005, in Lake Charles, Louisiana has been received. A final rating of Acceptable has been assigned.

The rating was based on the Reviewer-In-Charge (RIC) Summary Memorandum and supporting documentation. The Field Office Director must now initiate the following actions in accordance with the Detention Management Control Program (DMCP):

- 1) The Field Office Director, Detention and Removal Operations, shall notify the facility within five business days of receipt of this memorandum. Notification shall include copies of the Form G-324A, Detention Facility Review Form, the G-324A Worksheet, RIC Summary Memorandum, and a copy of this memorandum.
- 2) A Tuberculosis (TB) policy needs to be developed and implemented.
- 3) The Field Office Director shall schedule the next annual review on or before October 31, 2006.

Should you or your staff have any questions regarding this matter, please contact (b)(6), (b)(7)c Deputy Assistant Director, Detention Management Division at (202) 732-(b)(2) C
