MEMORANDUM FOR:

Wesley J. Lee Acting Director Headquarters Detention and Removal Operations

FROM:

Reviewer In Charge Los Angeles Detention and Removal Operations

SUBJECT:

Review Summary Report, San Bernardino Central Detention Center

The Los Angeles Office of Detention and Removal Operations performed a review of the San Bernardino Central Detention Center on June 15, 2005. This review was performed under the supervision of b6, b7c, Reviewer-In-Charge. Team members consisted of officers assigned from the Los Angeles Office of Detention and Removal Operations.

The review measured compliance with the ICE Detention Standards. No other special assessments were performed or requested at this time. Attached to this memorandum is a copy of the original Form G-324B Detention Review Forms. All worksheets and working papers are maintained in the appropriate file system and are available for review by the Review Authority.

### **Type of Review:**

This review was a routine scheduled assessment and was conducted for the sole purpose of determining overall compliance with the ICE Detention Standards. Not including the Reviewer in Charge, the team members were b6, b7c b6, b7c betention Operations Supervisor.

### **Review Summary:**

The following review summarizes only those standards <u>not</u> in full compliance. Each Standard is identified and a short summary is provided regarding standards or procedures not currently in compliance. In some instances, it appears that the facility meets the standard but is required to change its operating procedures to comply with language contained in the ICE Detention Standards. These are considered to be administrative changes that do not affect the daily operation or will have

an insignificant affect on how the facility is operated. There were 23 acceptable standards and 0 deficient standard.

The facility meets the standard but is being requested to change its operating procedures to comply with the language contained in the INS Detention Standard in one area. The recommendation is to physically secure all knives to a workstation that are not in a secure cutting room. This is considered to be an administrative change that does not affect the daily operation or will have an insignificant affect on how the facility is operated.

Overall, the Review indicated substantial compliance with the ICE Detention Standards. The staff we encountered was courteous, knowledgeable, and professional. They were acceptable and open to recommendations for changes to their facility.

# Constraints of difficulties experienced during the review:

During the review, no constraints or abnormal difficulties were encountered. Staff and detainees were cooperative and available to assist reviewers or to answer questions posed by the team.

### At Risk or Repeat Findings:

None of the ICE detention standards were found to be at risk during the inspection of this facility.

#### **Recommended Rating and Justification:**

The result of a careful evaluation and review of the procedures and operation of the facility reflects their ability to provide for the proper and humane care of ICE detainees within the guidelines of the ICE Detention Standards. The detention functions are being adequately performed. The deficiencies that exist do not detract from the acceptable accomplishment of the vital functions. Internal controls are such that there are no performance breakdowns that would keep the program from continuing to accomplish its mission. As a whole, the documentation viewed supports the notion that the facility should be rated as **acceptable**.

#### **<u>RIC Assurance Statement:</u>**

It is the opinion of the Reviewer In Charge that the findings of compliance and non-compliance are documented on the G-324B Inspection Form and that it is supported by documentation in the review file.

# ADMISSION AND RELEASE

**Policy:** All detainees will be admitted and released in a manner that ensures their health, safety, and welfare. The admissions procedure will, among other things include: medical screening; a file-based assessment and classification process; a body search; and a search of personal belongings, which will be inventoried, documented, and safeguarded as necessary.

Components	Yes	No	NA	Remarks	
In-processing includes orientation information.	$\boxtimes$			Handbook and video	
Medical screenings are performed by a medical staff <u>or</u> persons who have received specialized training for the purpose of conducting an initial health screening.					
All new arrivals are searched in accordance with the "Detainee Search" standard. An officer of the same sex as the detainee conducts the search and the search is conducted in an area that affords as much privacy as possible.					
The "Contraband" standard governs all personal property searches. IGSAs use or have a similar contraband standard. Staff prepare a complete inventory of each detainee's possessions. The detainee receives a copy.	⊠				
Staff completes Form I-387 or similar form for CDFs and IGSAs for every lost or missing property claim. IGSA facilities forward all I-387 claims to ICE.					
Detainees are issued appropriate and sufficient clothing and bedding for the climatic conditions.	$\boxtimes$				
All releases are coordinated with the ICE office of jurisdiction.				All releases are coordinated with the San Bernardino Sub-Office	
ICE Staff enter all information on detainees admitted, released, or transferred into the Deportable Alien Control System (DACS).				ICE not on site. DACS performed by DRO at SBD Sub-Office.
