MEMORANDUM FOR:

Ronald Smith

Field Office Director

San Diego Field Office

FROM:

John P. Torres

Acting Director-

SUBJECT:

San Diego Correctional Facility Annual Detention Review

Headquarters Detention and Removal Operations conducted a detention review of the San Diego Correctional Facility October 18-20, 2005, in San Diego, California. A final rating of <u>Good</u> has been assigned.

The rating was based on the Reviewer-In-Charge (RIC) Summary Memorandum and supporting documentation. The Field Office Director must remedy the deficiencies in the RIC Memorandum, and initiate the following actions in accordance with the Detention Management Control Program (DMCP):

- The Field Office Director, Detention and Removal Operations, shall notify the facility within
 five business days of receipt of this memorandum. Notification shall include copies of the
 Form G-324A, Detention Facility Review Form, the G-324A Worksheet, RIC Summary
 Memorandum, and a copy of this memorandum.
- 2) The Field Office Director is responsible for ensuring that the facility responds to all findings and a Plan of Action is submitted to the Review Authority (RA) within 30 days.
- 3) The RA will advise the Field Office Director once the Plan of Action is approved.
- 4) Once a Plan of Action is approved, the Field Office Director shall schedule and follow-up on the above noted deficiencies within 90 days.

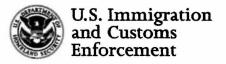

Should you or your staff have any questions regarding this matter, please contact Deputy Assistant Director, Detention Management Division at (202) 732 b2 high

SUBJECT:

San Diego Correctional Facility Detention Review Summary Report

The Detention Management Division, Detention Standards Compliance Unit, performed a Headquarters Detention Review of the San Diego Correctional Facility in San Diego, California October 18-20, 2005. This is a Contract Detention Facility (CDF) operated by the Corrections Corporation of America (CCA). The review was performed under the guidance of b6, b7c Reviewer-In-Charge. Team members included b6, b7c Phoenix Field Office, b6, b7c Los Angeles Field Office and b6, b7c Division of Immigration Health Services, Washington, DC.

Type of Review

This review is a scheduled Headquarters Review, which is performed to determine overall compliance with the Immigration Customs Enforcement (ICE) National Detention Standards (NDS). The facility received a previous rating of "Acceptable" during the August 2004 review.

Review Summary

The American Correctional Association (ACA), the National Commission on Correctional Health Care (NCCHC) and the Joint Commission on Accreditation of Health Organizations (JCAHO) accredit the San Diego Correctional Facility.

Standards Compliance

The following information is a summary of the standards that were reviewed and overall compliance determined during the 2004 and 2005 detention reviews:

| 2004 Review | | 2005 Review | | | | | |
|-------------------|----|-------------------|----|--|--|--|--|

Memorandum for John P. Torres San Diego Correctional Facility Review Summary Report Page 2

Detainee Classification System - Repeat Deficiency

- The facility inconsistently conducts classification of detainees upon arrival
- · Reclassification between 45 and 60 days after arrival is inconsistently conducted
- NCIC printouts are not used to classify detainees
- Form I-213 is inconsistently used to classify detainees

The team reviewed approximately seventy-five detainee detention files in determining that a systemic problem existed with classification at this facility. Files reviewed contained classification forms that were not completed, and others that were prepared incorrectly. The computer system used within processing inappropriately dates the classification form. Dates on the classification forms are not consistent with the actual date in which classification was conducted upon detainee arrival.

Staff-Detainee Communications Standard-Repeat Deficiency

- Staff conduct scheduled visits to the housing units to view living conditions
- Schedules of officer visits are posted within the housing units
- Detainee request form receipt and response activity is effectively logged
- Copies of detainee requests are not maintained

ICE does not maintain copies of responses to detainee request forms consistent with the file and maintenance component of the Standard. The team tracked twenty detainee request forms that had been logged in and responded to in order to verify if copies were placed within the detainee detention files. This review resulted in a systemic problem being identified. ICE does not maintain copies of request forms within the detainee detention files.

Significant Observations

Access to Telephones

The facility recently re located the housing unit television sets approximately twenty-five feet away from the telephone carousel area. This Standard was found deficient during the 2004 review, due to the location of the television set and the volume impeding, and not allowing a reasonable degree of privacy during telephone use. Interview of approximately twenty-five detainees in two randomly selected units during this review revealed that detainees were satisfied with corrective action taken by the facility and advised that telephone privacy has improved with the television volume not interfering. Unit managers advised that detainees are further allowed a degree of privacy and are allowed to use the office telephone with supervision if requested.

Significant Observations

Staff Appearance - Significant Observation

ICE and contract security staff presented a neat appearance. Officers were well groomed; uniforms and equipment were maintained neatly. Escorting officers remained cognizant and directed detainees professionally during escorts. Searches of personnel entering and exiting the facility at the front entrance were conducted thoroughly. Identification documents were also verified.

Food Service - Best Practice

Food Service was observed during food preparation and meal delivery. During food preparation, workers continuously maintained safety by mopping up food and water spills to prevent injury. Workers wore hairnets and gloves while handling food items. Hidden areas behind ovens and the dishwasher were well painted and clean. Hidden areas within dry and freezer storage, six inches above ground were very clean and well painted. Food temperatures were taken within the kitchen and after delivery to the housing units and were in compliance. This kitchen is under the supervision of a well-experienced Food Service Administrator. The hard work and dedication of the entire Food Service crew has demonstrated their ability to have this area recognized as a "Best Practice" during this review.

Tool Control-Best Practice

Tool control was clean and well organized with shadow boards to identify tool locations. Tool issuance includes the use of a plastic chit with the photograph of the employee using the tool for visual reference and tracking. Weekly departmental inventories are conducted for accountability purposes and logs are effectively maintained for tracking tools in the event of an emergent situation. The tool room is under the guidance of a very knowledgeable supervisor and well-experienced crew whose hard work and dedication allowed this area to be recognized as a "Best Practice" during this review.

Detainee Request Tracking Log-Best Practice

The facility has created a local program for tracking detainee request forms. This log was created with the parameters set forth in the Staff-Detainee Communications Standards and is capable of tracking incoming and outgoing detainee request activity. The program can be used to produce reports by date and nationality. This program was recognized as a "Best Practice" during this review.

Memorandum for John P. Torres San Diego Correctional Facility Review Summary Report Page 4

RIC Observations

The Officer In Charge, Warden and staff were very supportive during the review. Staff encountered during the review, clearly displayed professionalism illustrated by their leadership. This facility is under very good management and has excelled from the previous review in 2004.

Recommended Rating and Justification:

The Reviewer-In-Charge recommends a rating of "Good." The facility has made major improvements since the 2004 review by correcting and minimizing the total number of deficiencies and creating an effective tracking mechanism for detainee request activity. The facility complies with 36-of-38 applicable ICE Detention Standards. The facility should respond to all findings and initiate a Plan of Action in response to the deficiencies.

RIC Assurance Statement:

The findings of compliance and noncompliance are documented on the G-324a Inspection form and are supported by documentation in the review file.

Significant Incident Summary Worksheet

For ICE to complete its review of your facility, the following information must be completed prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

| The facility has a system for classifying detainees. In CDFs and IGSAs, an Objective Classification System or similar is used. | \boxtimes | | | |
| The facility classification system includes: Classifying detainees upon arrival. Separating individuals who cannot be classified upon arrival from the general population. The first-line supervisor or designated classification specialist reviewing every classification decision. | | ⊠ | | Please see remarks below |
| The intake/processing officer reviews work-folders, A- files, etc., to identify and classify each new arrival. | \boxtimes | | | |
| Staff use only information that is factual, and reliable to determine classification assignments. Opinions and unsubstantiated/ unconfirmed reports may be filed but are not used to score detainees classifications. | | × | | It appears that insufficient information is being used to determine the subject's classification. Very seldom is CLETS or NCIC printouts used. |
| Housing assignments are based on classification- level. | \boxtimes | | | |
| A detainee's classification-level does not affect his/her recreation opportunities. Detainees recreate with persons of similar classification designations. | × | | | |
| Detainee work assignments are based upon classification designations. | × | | | |
| The classification process includes reassessment/reclassification. For IGSA's detainees may request reassessment between 45 and 60 days after arrival. For CDF's detainees are re-assessed approximately every 60 days. | | | | Please see remarks stated below. |
| The classification system includes standard procedures for processing new arrivals' appeals. Only a designated supervisor or classification specialist has the authority to reduce a classification-level on appeal. | ⊠ | | | |
| Classification appeals are resolved within five business days and detainees are notified of the outcome within 10 business days. | × | | | |
| Classification designations may be appealed to a higher authority such as the Warden or equivalent. | ⊠ | | | The subject can file a grievance. |
