

Dear TASER International,

I would like to commend TASER International on the 34000 series and the ADVANCED TASERS. We have been using the 34000 for several months and have had an opportunity to use it on one subject. This person was extremely combative and would have taken several officers to subdue but with the assistance of the AIR TASER, he was taken into custody by only one officer with no injuries to either the inmate or the officer.

In the past we have experienced altercations where several officers and subjects have received serious injuries and required weeks of rehabilitation. The AIR TASER is the light at the end of the tunnel. We have recently exchanged the 34000 for the newer and are completely satisfied with both the product and your company. At the present we have attempted to deploy the on two occasions but received immediate compliance when confronted with the. The seems to be a well built product and appears as durable as your advertisements indicate. This is exactly what the corrections environment has needed for years, the more we can reduce hand to hand combat the better our working environment.

Thanks from the Marion County Sheriff's Office.

- Capt. Craig Macdonald
