**Department:** Training  
**Version:** 1.0  
**Release Date:** 4/27/2010

---

## Training Bulletin 16.1: Release of Training Bulletin 17

**Background:** In order to keep TASER training courses current and cutting edge, TASER International periodically updates its training materials as new information and products become available.

Version 17.0 of the TASER International Instructor and User training courses has been released and will become effective May 1, 2010. Version 17 includes instructor and user courses on the TASER® M26™, X26™, X3™, XREP™, X12™, and Shockwave™ products.

With the release of Version 17, the TASER Instructor course will be 20 hours for new instructors (four hours online and 16 hours with a Master Instructor), and 16 hours for recertifying instructor (eight hours online and eight hours with a Master Instructor). Recertifying instructors are only required to attend day two of the session with the Master Instructor. The standard instructor course will certify students on the TASER X26 ECD only. TASER X3 and XREP ECD instructor courses are available on request.

We will mail the Version 17 DVD to all current Master Instructors. We are not sending a DVD of Version 17 to every instructor. Instead, you can go to <http://rcpt.yousendit.com/859471793/665a60e18cc3392296fa8b1bb12a7f25> to download the User Courses.

When downloading any course, also download the Support Materials folder. This folder contains the most recent warnings, exposure release forms, training forms and certificates, training drills and scenarios, and much more information. The link for the Support Materials folder is <http://rcpt.yousendit.com/859500799/76b86ddf5a4b4af198be8de353506a4b>

We will continue to send out the training DVDs to all instructor courses.

If you have any questions regarding this Training Bulletin, Version 17 or how to download it, please contact the TASER Training Department at [Training@TASER.com](mailto:Training@TASER.com) or (800) 978-2737, option 7.
